DIGITAL DATA FLOWS

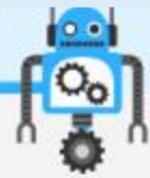

EMERGING TECH MASTERCLASS SERIES

The Digital Data Flows Masterclass series is an educational program designed for regulators, policymakers, and staff seeking to better understand the data-driven technologies at the forefront of privacy and data protection law & policy.

Classes	Date	Location
1. Artificial Intelligence and Machine Learning	25 Oct 2018	Brussels
2. Location Data: GPS, Wi-Fi, & Spatial Analytics	27 Nov 2018	Brussels
3. De-Identification, Differential Privacy, and Homomorphic Encryption	30 Jan 2019	Brussels
4. Online Advertising, Data Flows, Behavioral Targeting, and Cross-Device Tracking	1 May 2019	Wash. DC
5. Mobile Apps: Operating Systems, Software Development Kits (SDKs), and User Controls	25 Jul 2019	Virtual
6. Facial Recognition and Biometric Data	27 Feb 2020	Wash. DC
7. Connected Cars and Autonomous Vehicles	25 Jun 2020	Virtual
8. Blockchain Technologies	29 Oct 2020	Virtual
9. Machine Learning and Speech	9 Dec 2020	Virtual

Access recordings and materials for all previous classes at www.fpf.org/classes

Speakers

Professor Marine Carpuat, Associate Professor in
Computer Science at the University of Maryland

Dr. Prem Natarajan, VP, Alexa AI-NU

12.09.20
FPF Masterclass on
Machine Learning and Speech

Prem Natarajan, Ph.D.
VP, Alexa AI, Natural Understanding
Amazon

Outline

Evolution of AI

- The Origin Story: Historical development
- Salient science and technology advances

Transformational Advance: Machine-learning powered AI

Human Computer Interaction and Conversational AI

- Case Study: Alexa

Learning with Less Labeled Data

Societal Impact

AI: The Origin Story

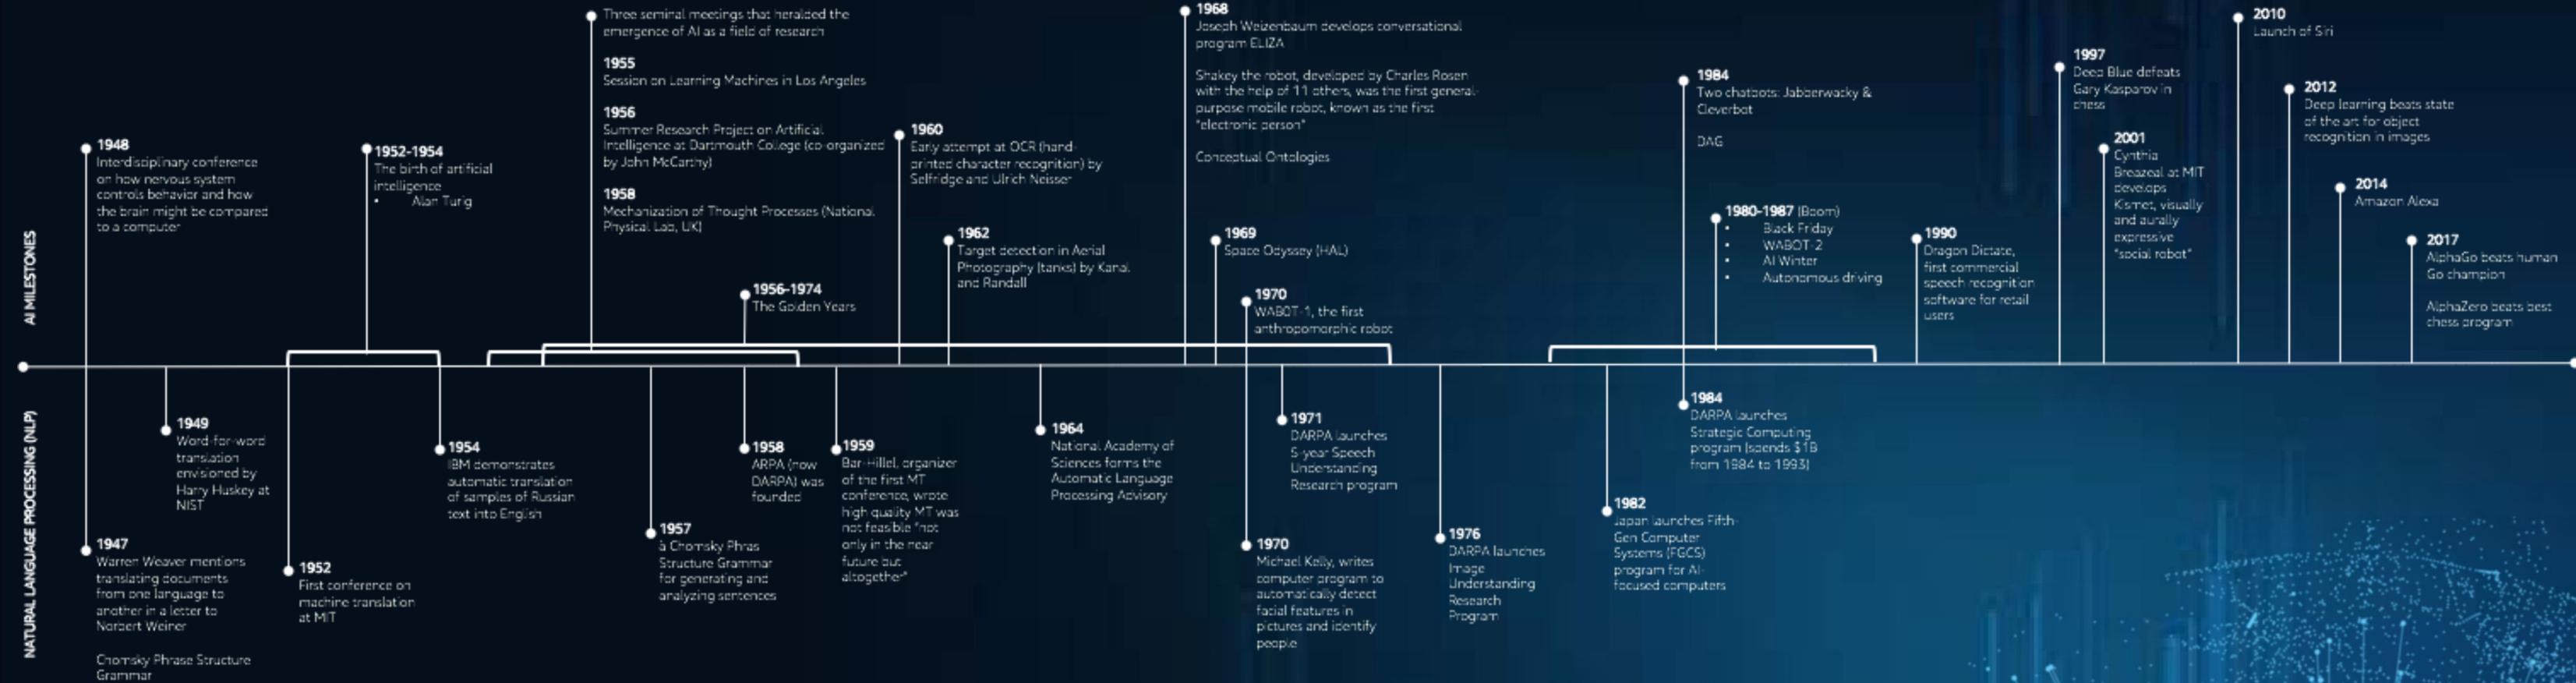

Evolution of AI

Emergence of AI as a Field of Research

Session on Learning Machines in Los Angeles (1955)

“There is considerable promise that systems can be built in the relatively near future which will imitate considerable portions of the activity of the brain and nervous system” - *Willis Ware’s introduction as 1955 session chair*

The AI Journey: Milestones from 1948 - 2017

First AI Winter: 1974 – 1980

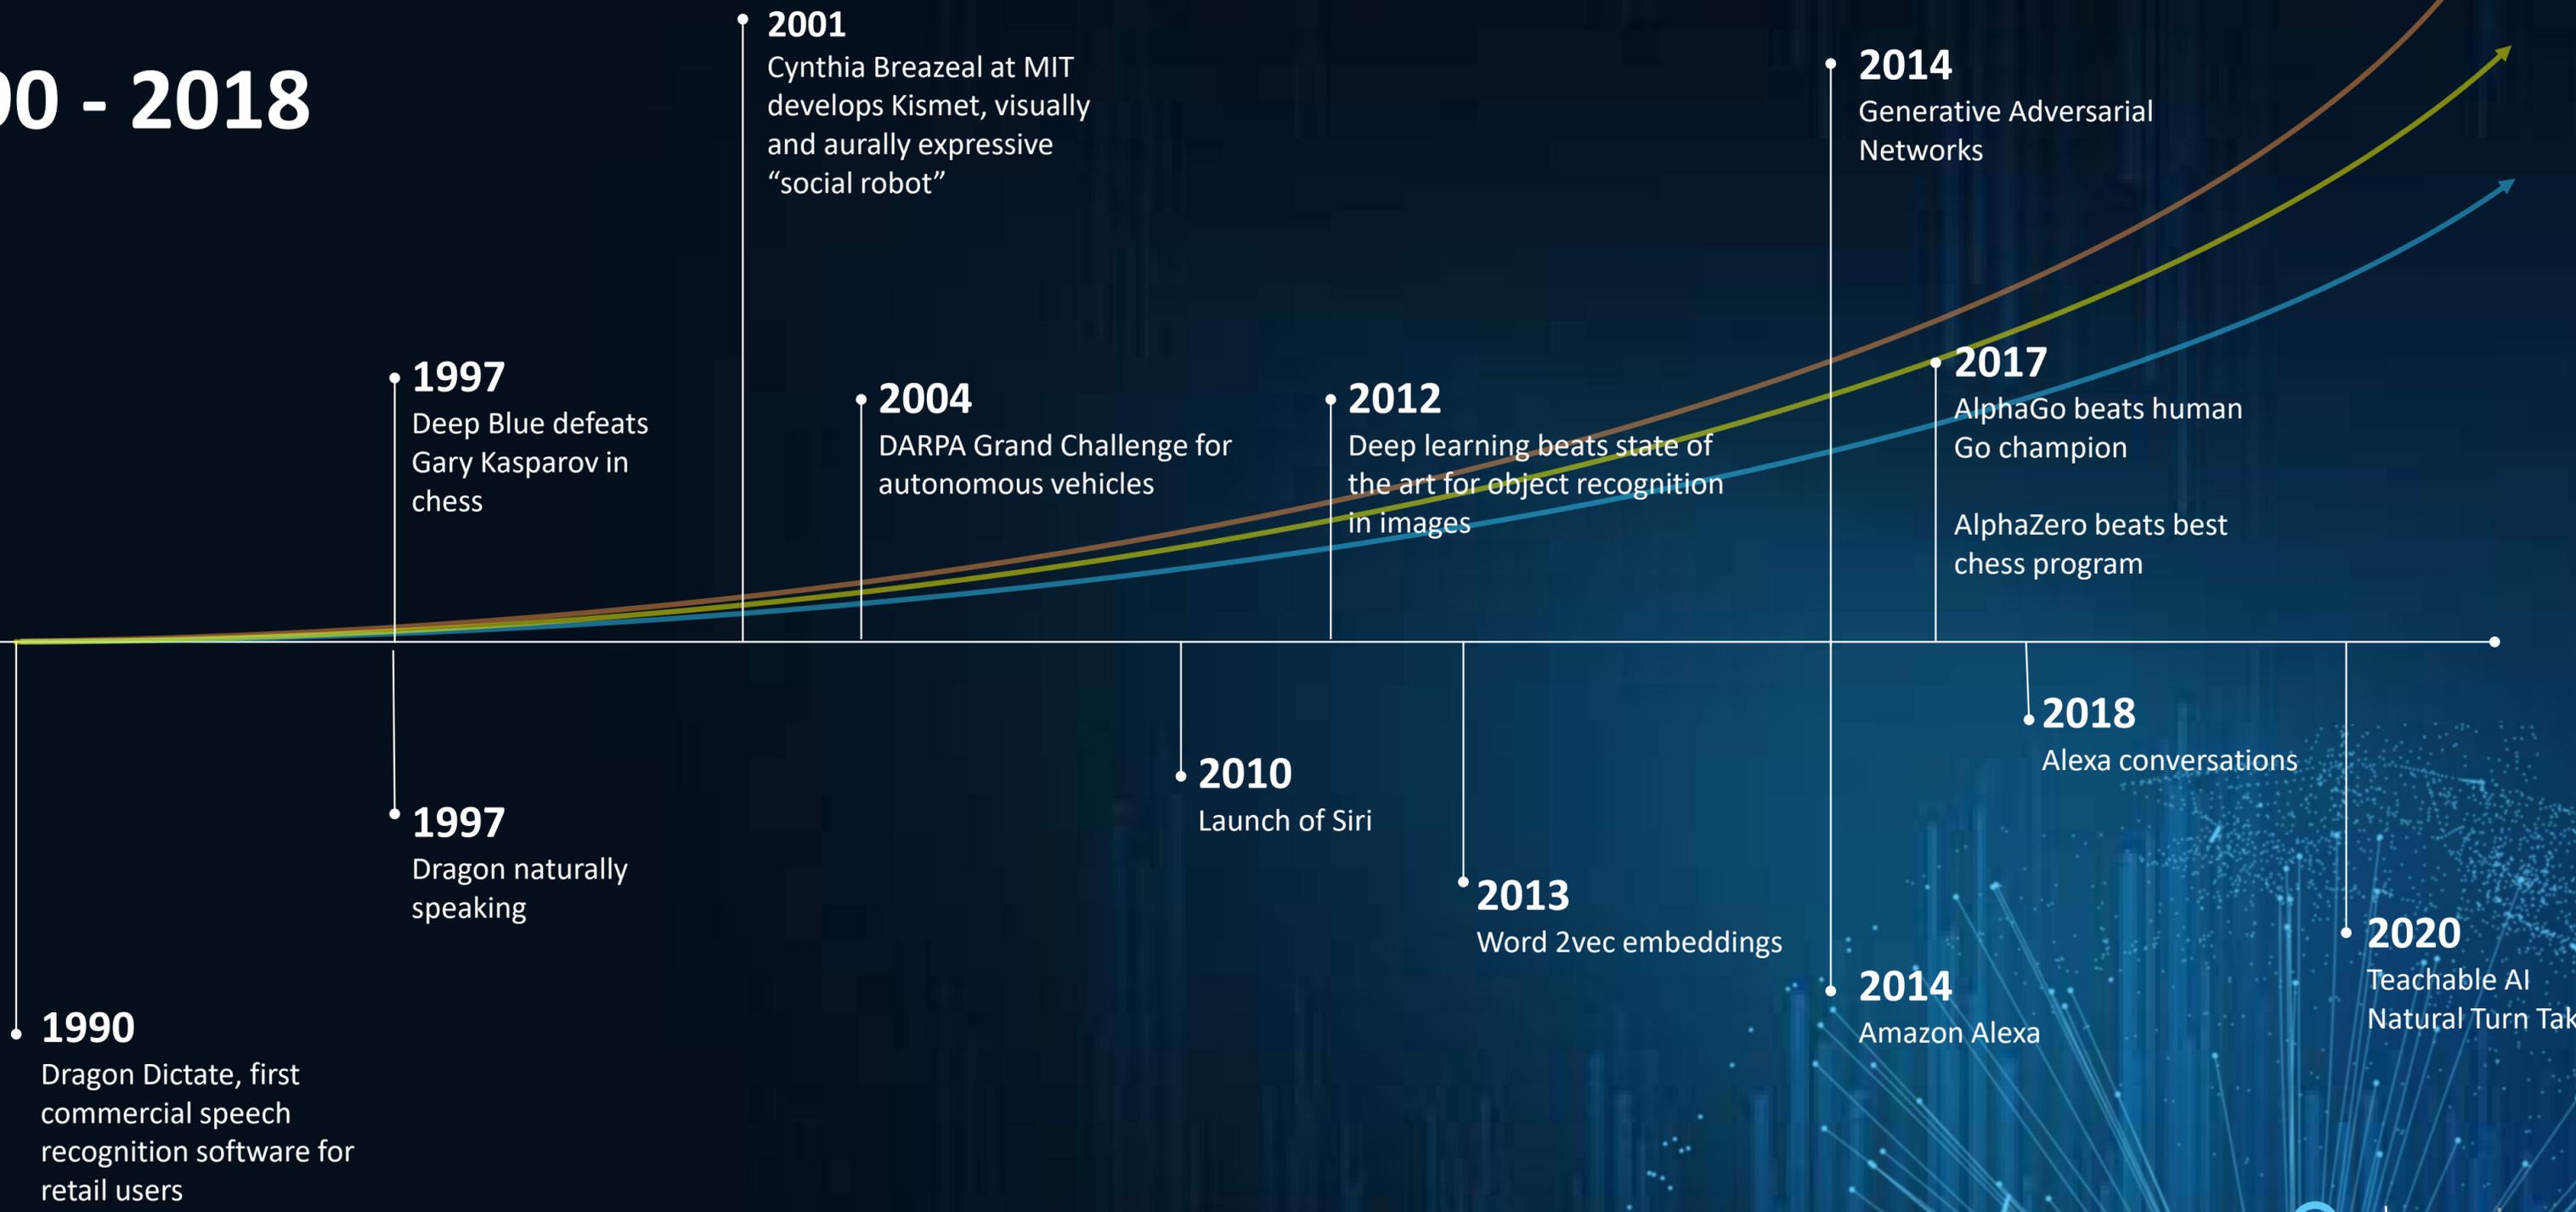

Second AI Winter: 1987 – 1993

1990 - 2018

AI MILESTONES

NATURAL LANGUAGE PROCESSING (NLP)

Golden Age of AI Today – Explosion of AI Applications

SELF DRIVING CARS

LANGUAGE

PRECISION MEDICINE

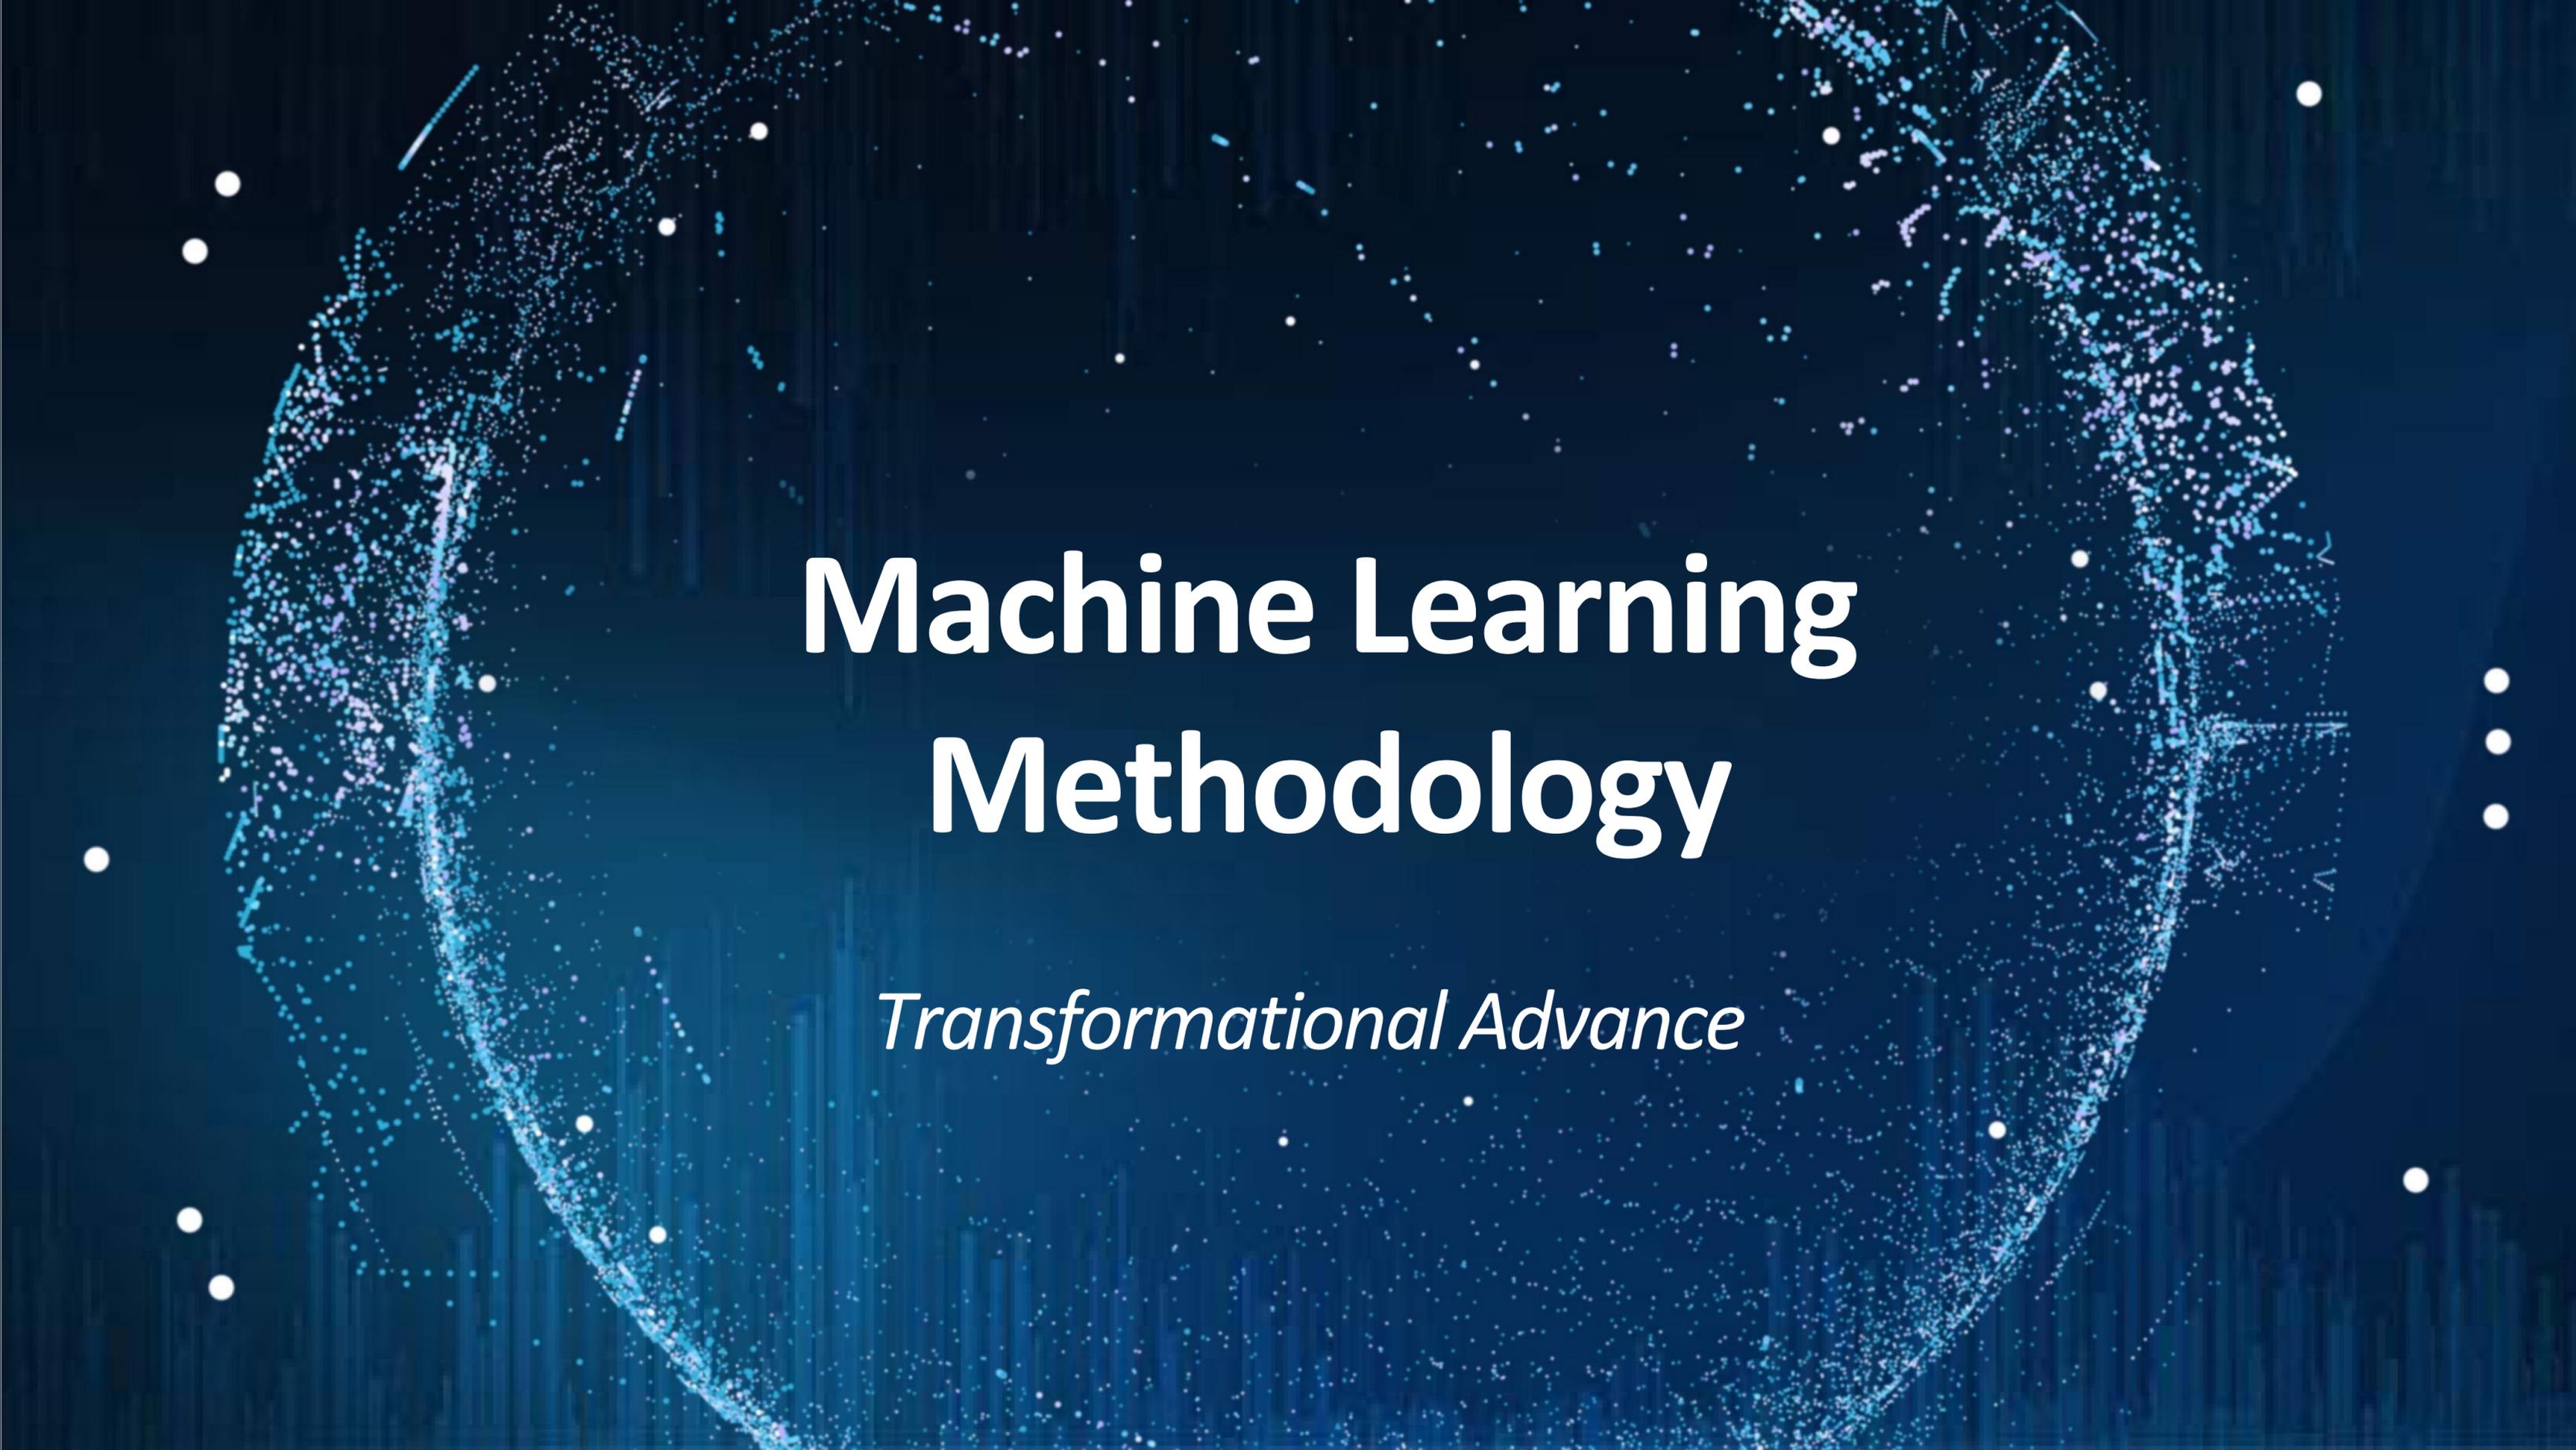

DATING APPS

COMPUTER GRAPHICS

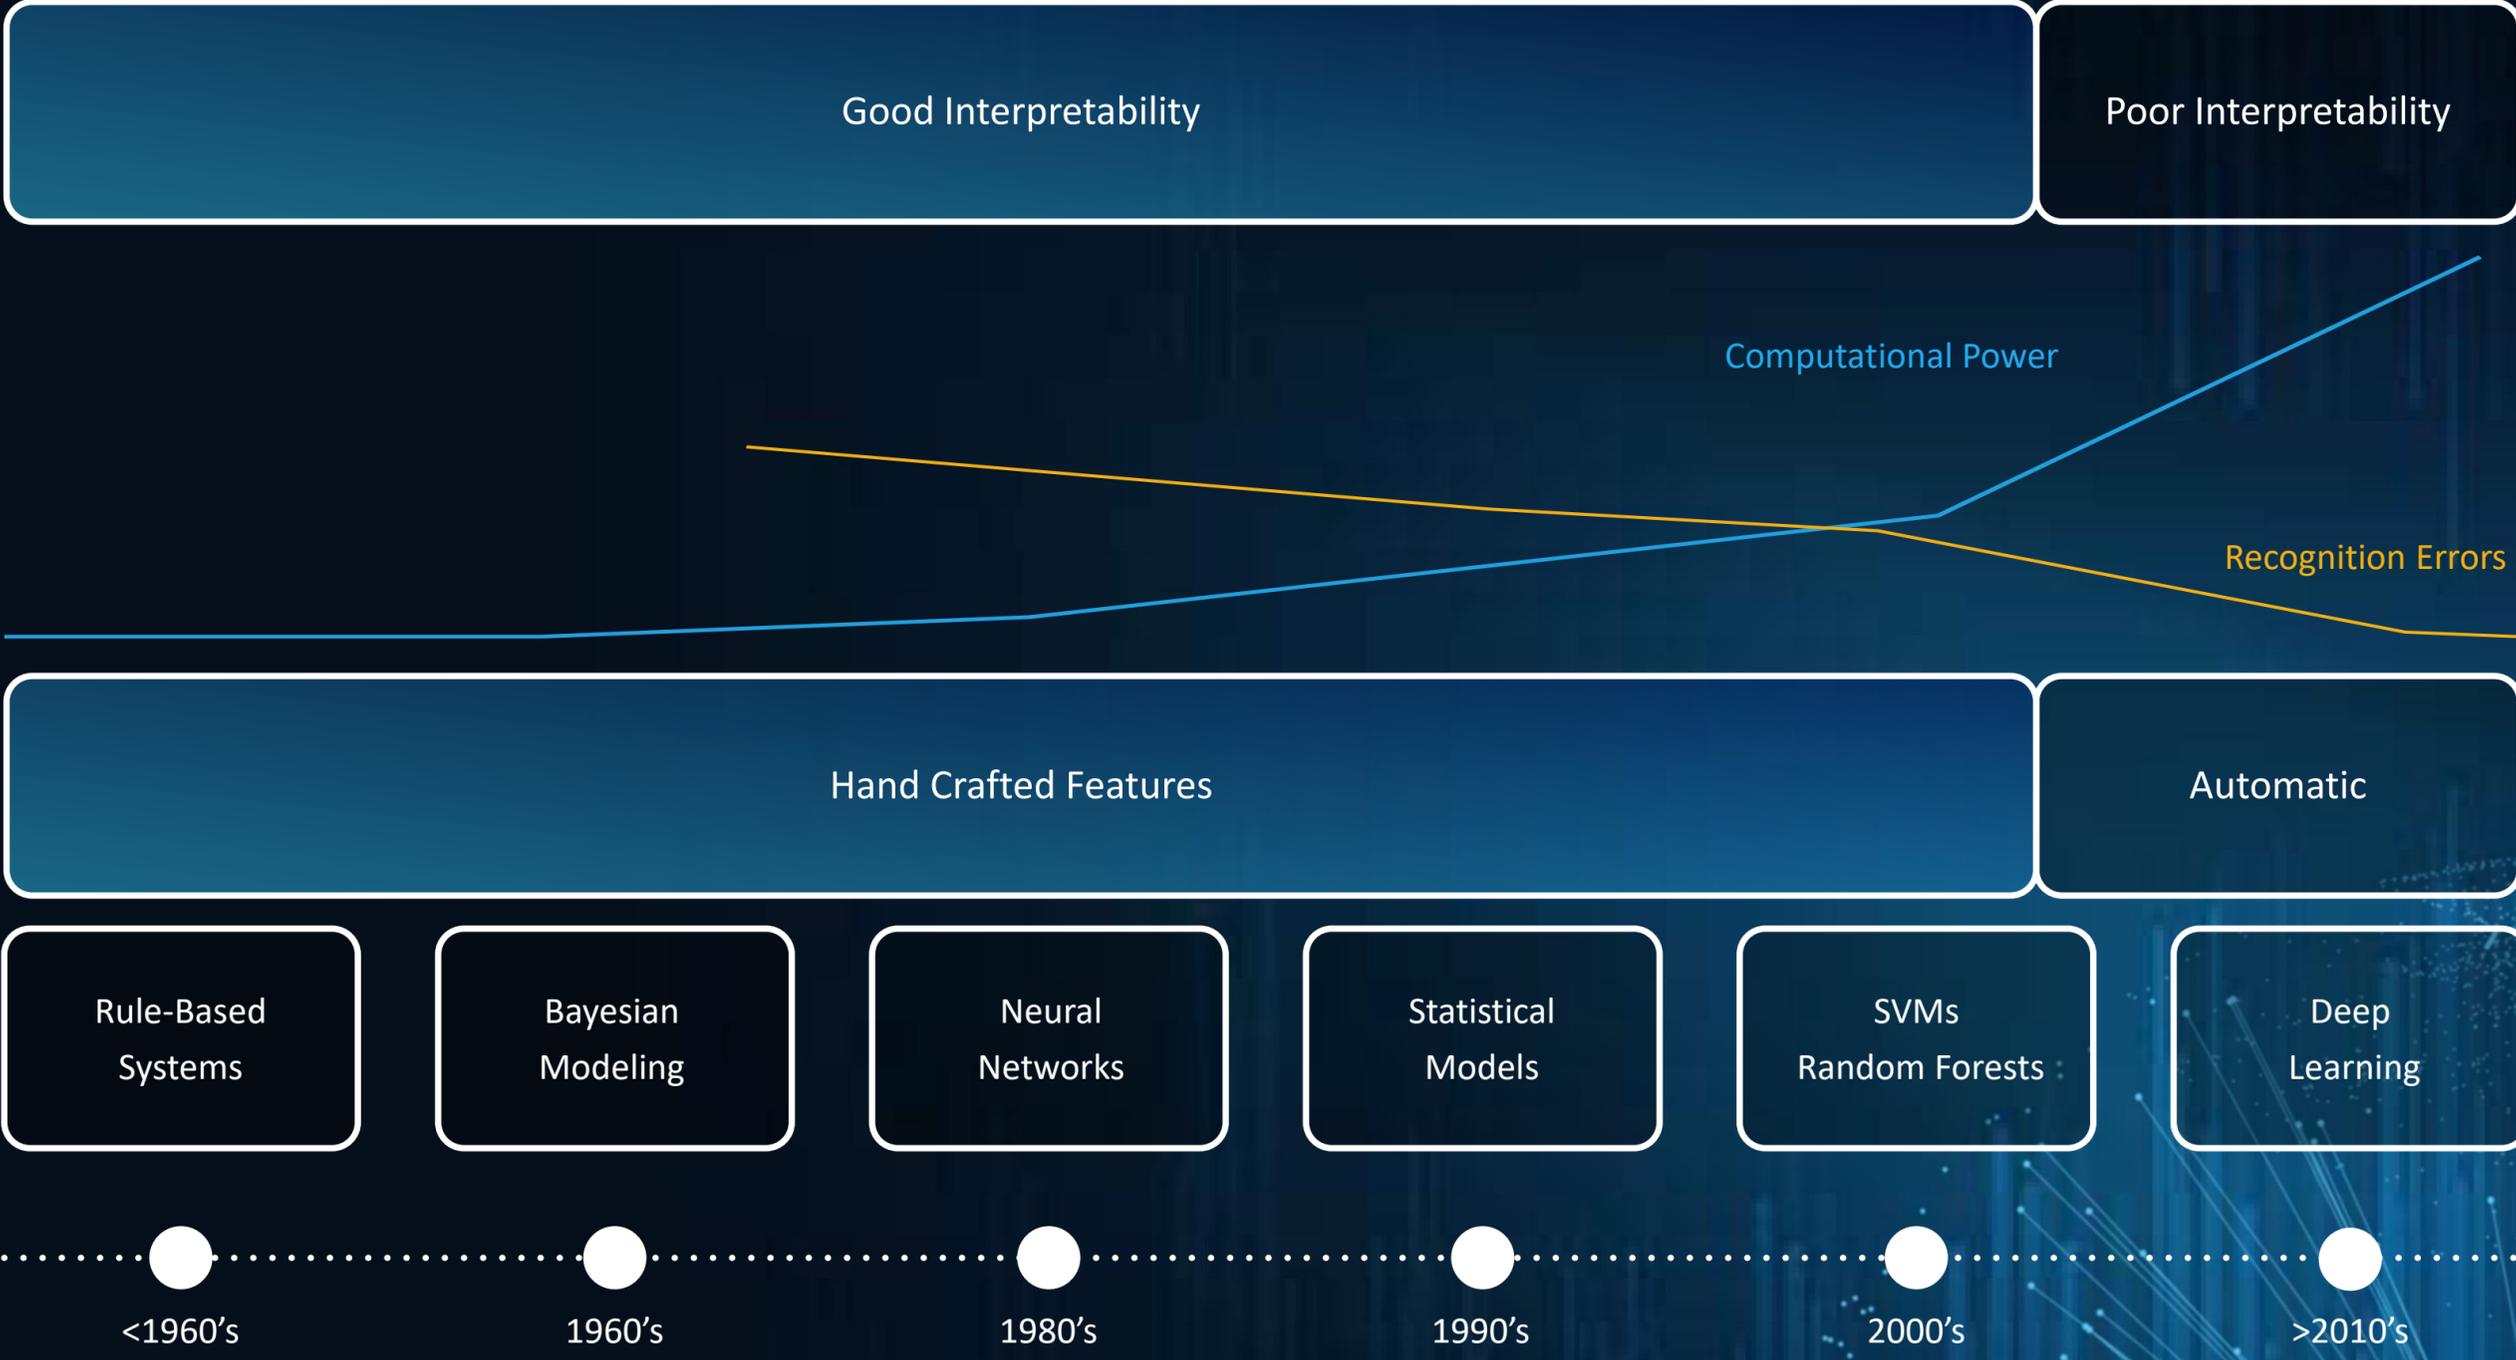

CONVERSATIONAL AI.

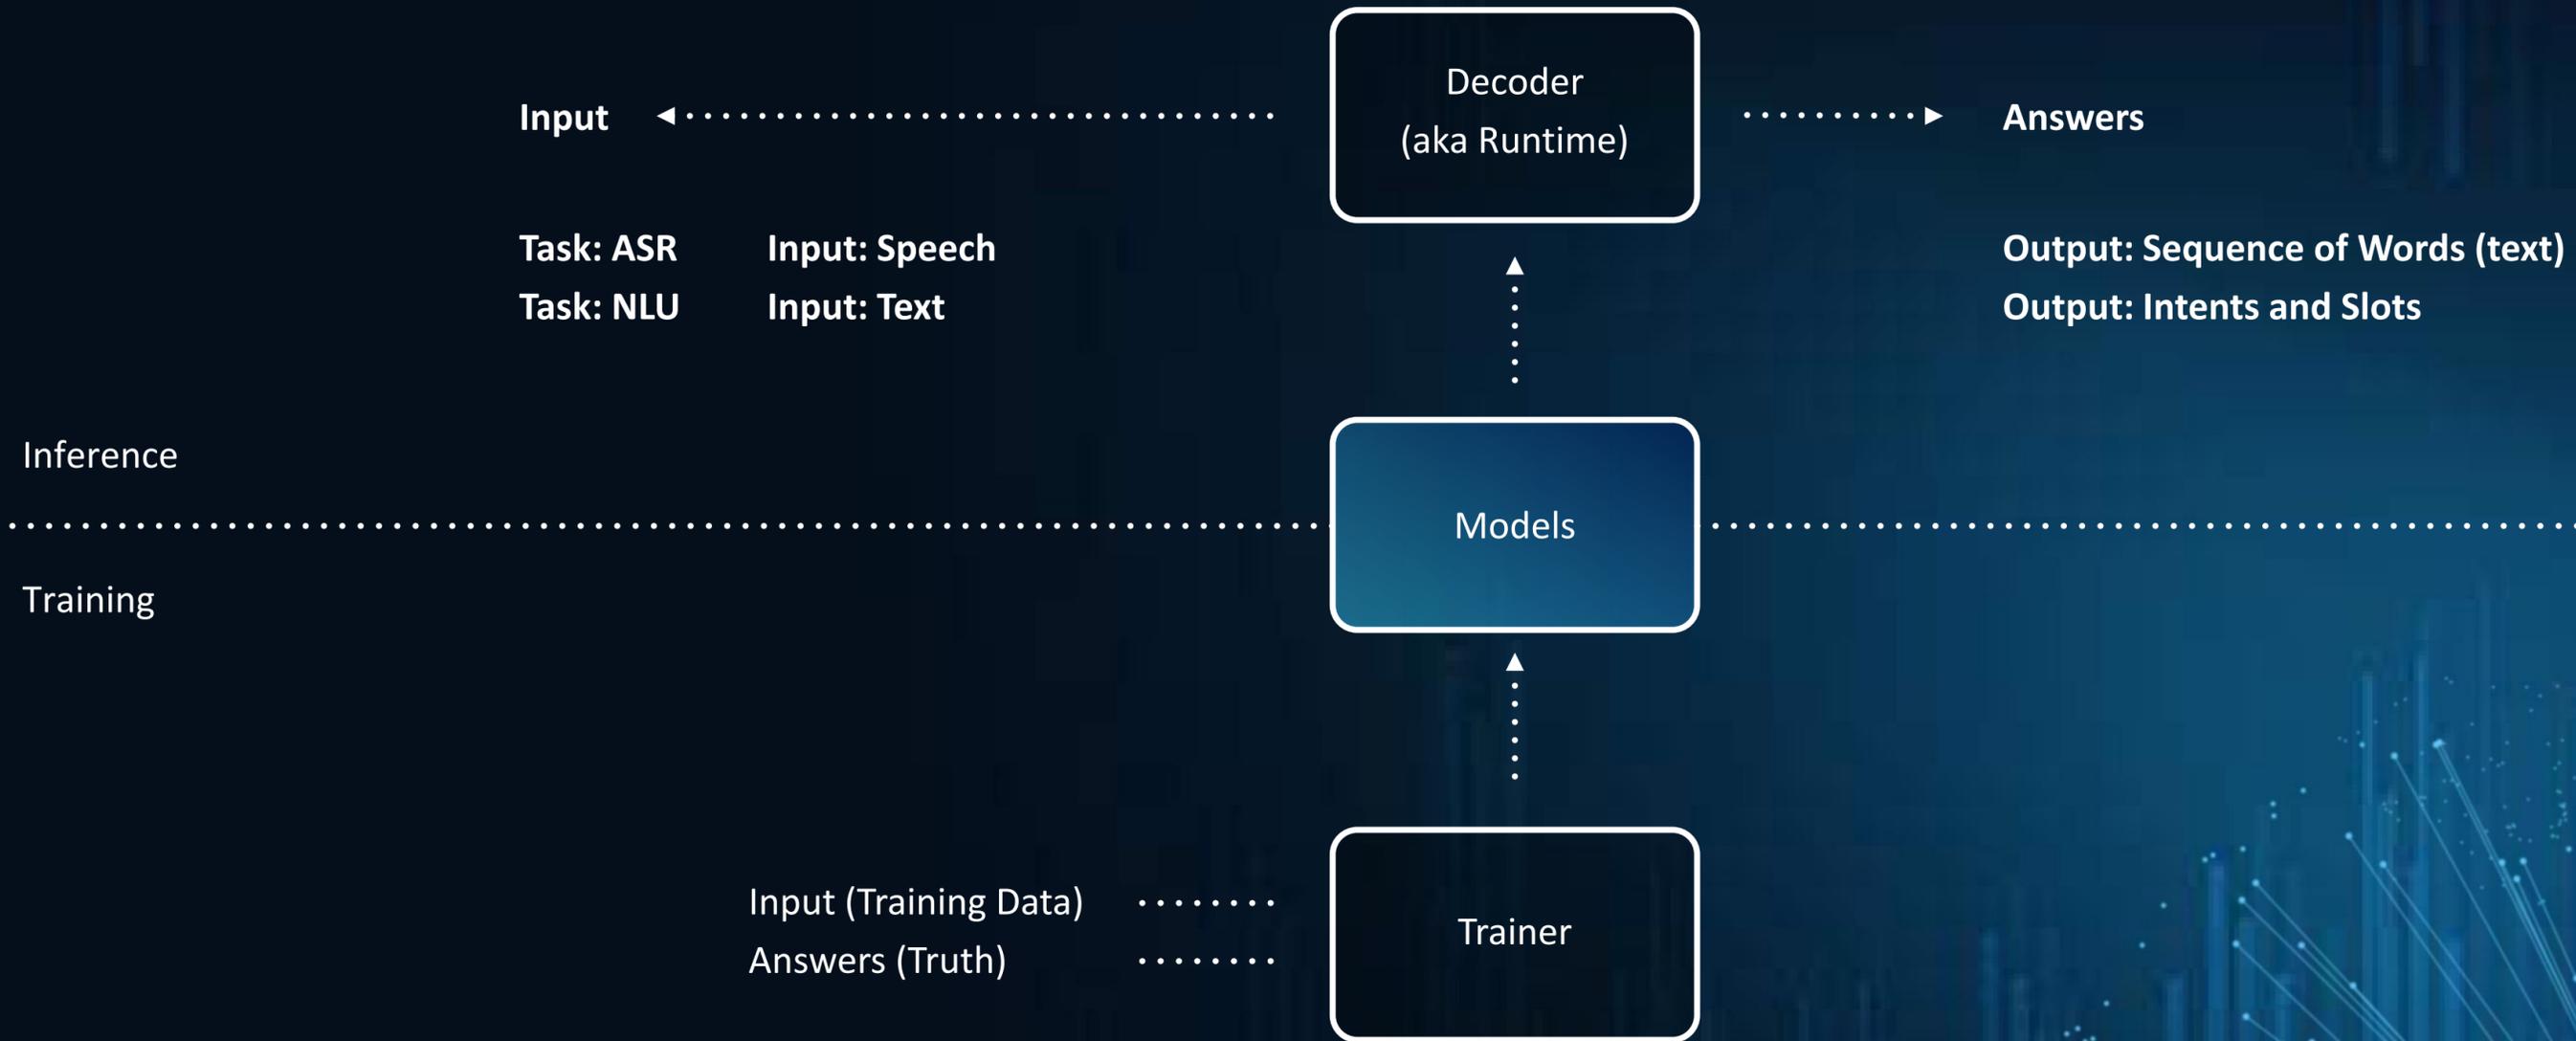

Machine Learning Methodology

Transformational Advance

AI Technological Evolution

Common Theme: Data Driven Machine Learning

Supervised ML: Most Popular Version of ML

Supervised ML: Example

What's Different About Deep Learning

Traditional Machine Learning

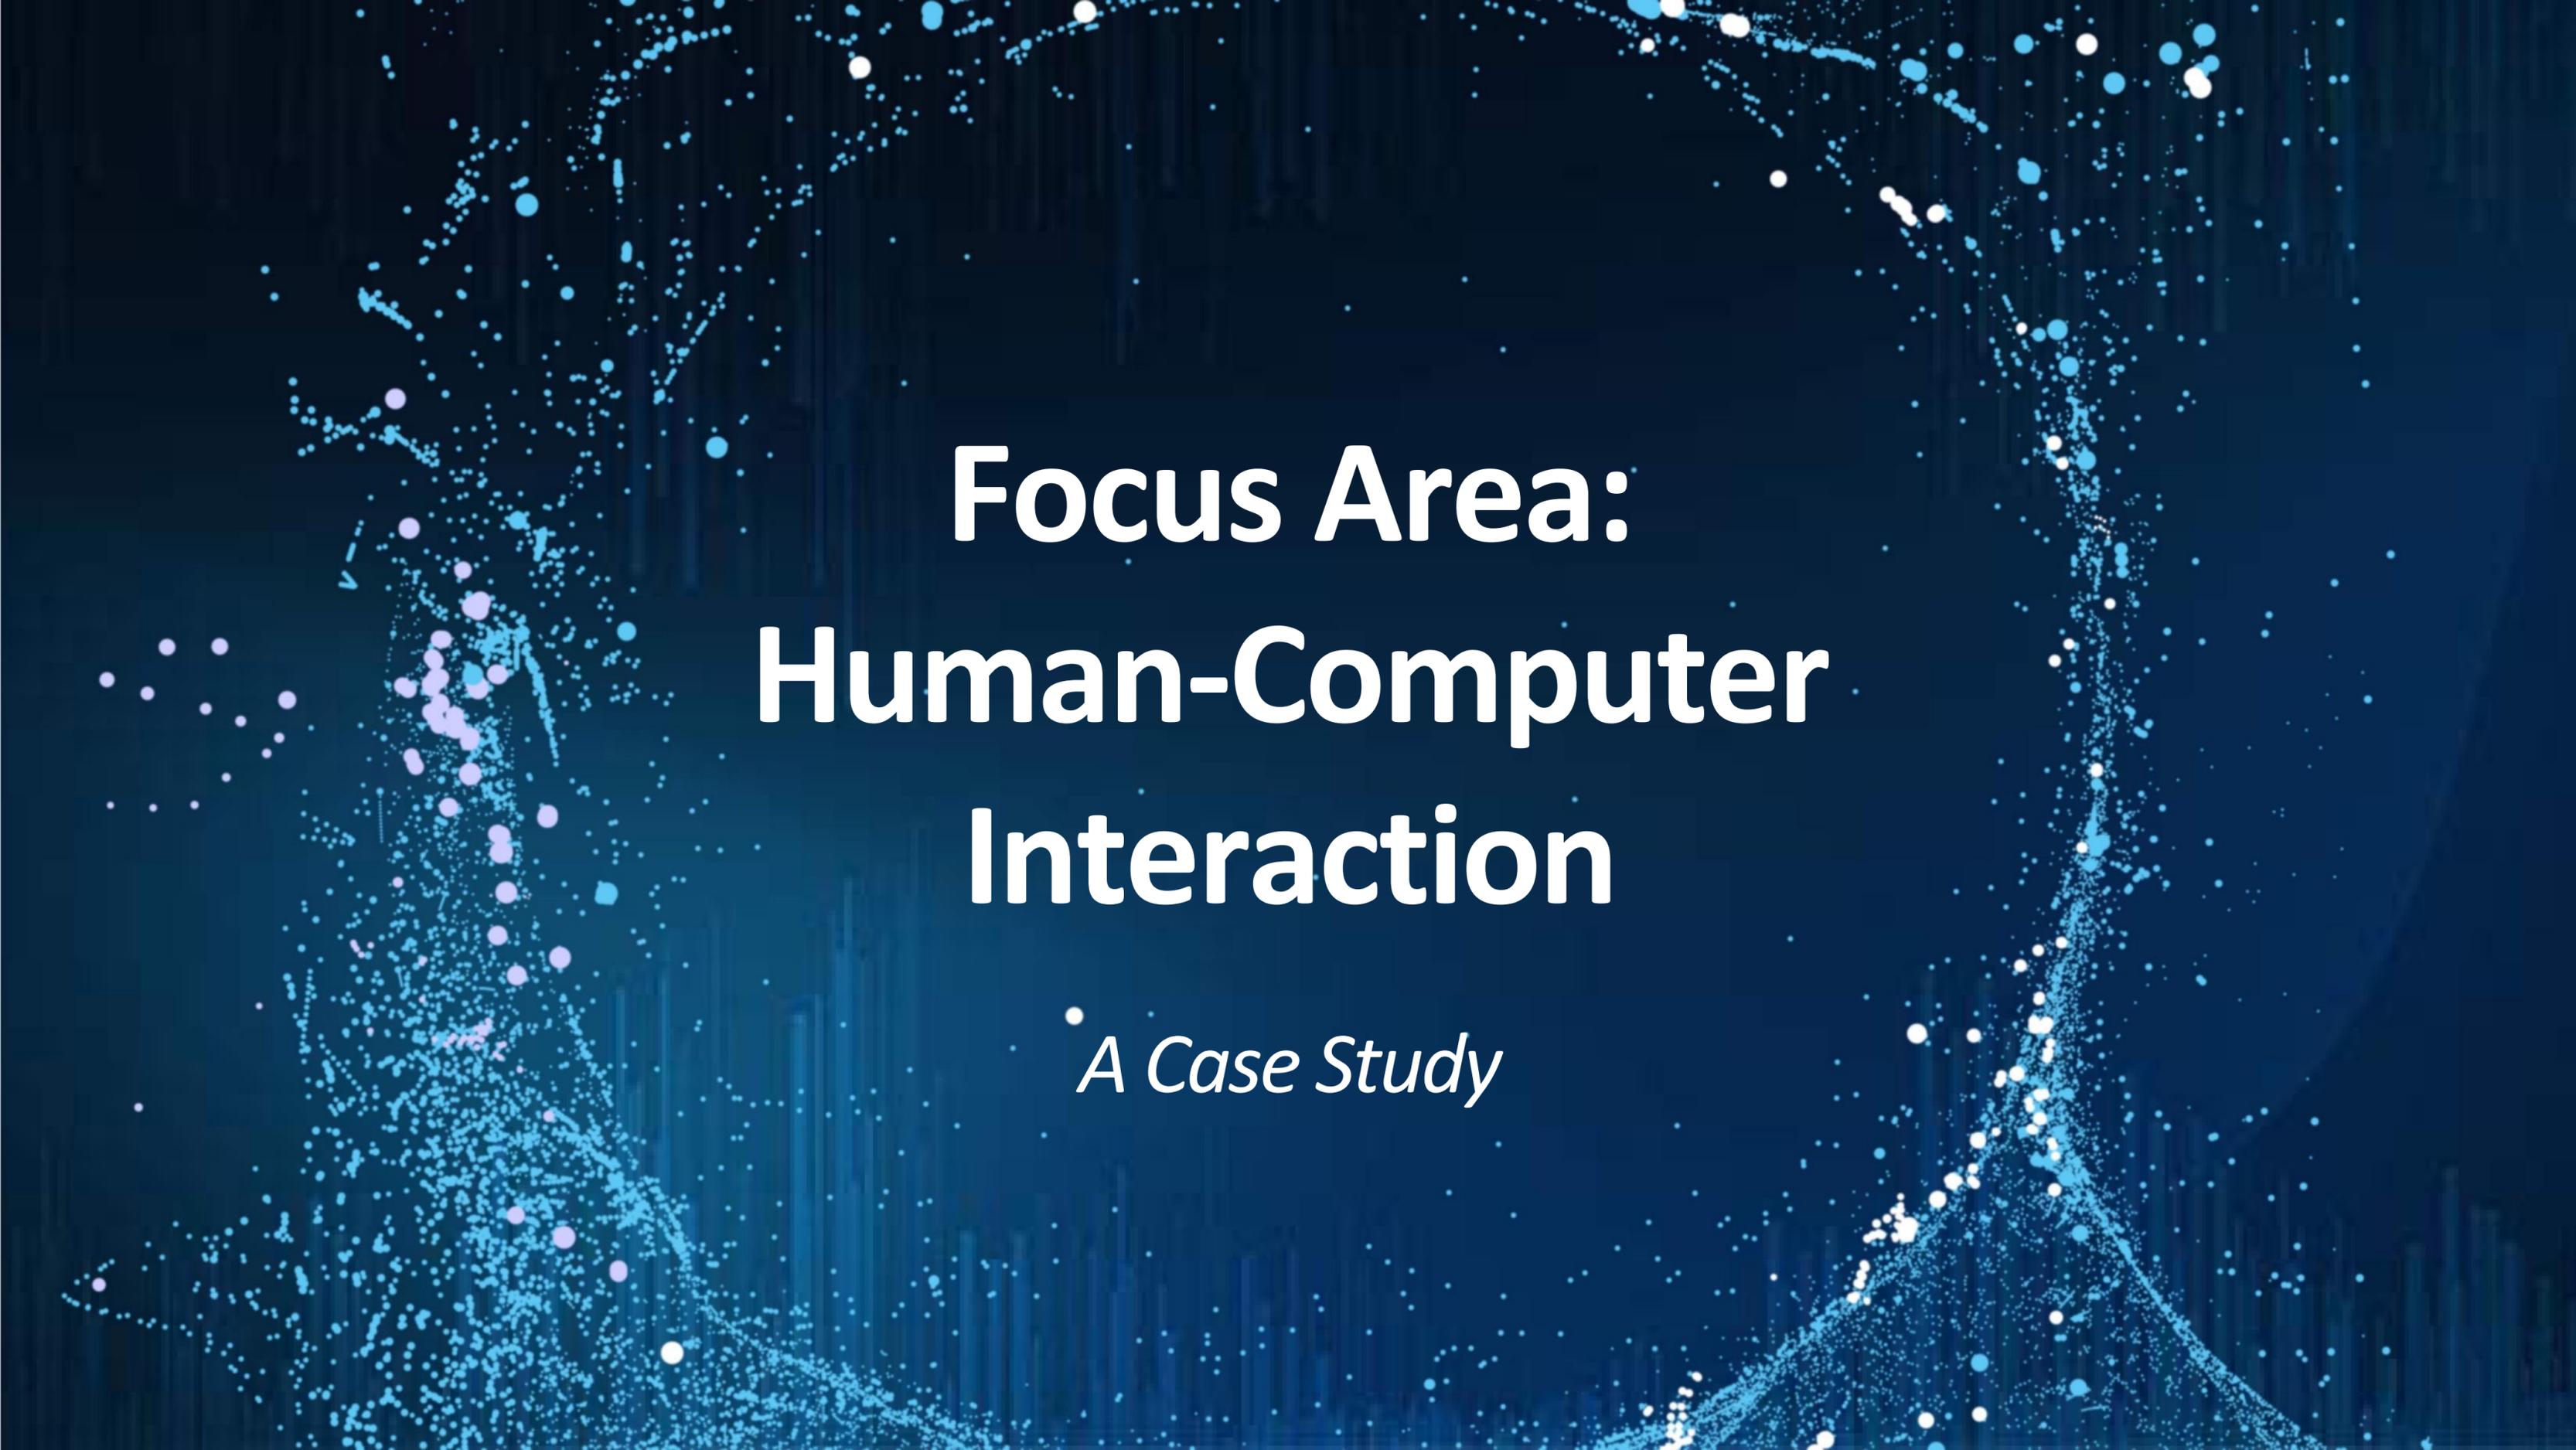

Deep Neural Networks

AI+ML: Powering Our World Today

The background features a complex, abstract pattern of glowing blue and white particles and light trails, resembling a digital or scientific visualization. The particles are scattered across the frame, with some forming distinct, curved paths that suggest movement or data flow. The overall color palette is dominated by various shades of blue, from deep navy to bright cyan, with white highlights that create a sense of depth and energy.

Focus Area: Human-Computer Interaction

A Case Study

Evolution of Human Computer Interfaces

Implicit or Explicit
Customer Feedback

Teachable AI

- **Goal**: Learn new concepts and preferences through direct and interactive teaching by customers
 - Launched in November 2020 in the US

- Example:

User: Alexa, play this song at full blast

Alexa: I don't know what full blast means, can you please teach me?

User: full blast means maximum volume

Alexa: thank you, playing song at maximum volume

- Integrates natural language understanding with common-sense reasoning

User: Alexa, it's cold in here

Alexa: OK, should I increase the temperature of the thermostat?

1940-1959

AI MILESTONES

1948
Interdisciplinary conference on how nervous system controls behavior and how the brain might be compared to a computer

1950
Alan Turing's paper "Computing Machinery and Intelligence"

1952-1954
The birth of artificial intelligence

Three seminal meetings that heralded the emergence of AI as a field of research

1955
Session on Learning Machines in Los Angeles

1956
Summer Research Project on Artificial Intelligence at Dartmouth College (co-organized by John McCarthy)

1958
Mechanization of Thought Processes (National Physical Lab, UK)

1956-1974
The Golden Years

NATURAL LANGUAGE PROCESSING (NLP)

1947
Warren Weaver mentions translating documents from one language to another in a letter to Norbert Wiener

1949
Word-for-word translation envisioned by Harry Huskey at NIST

1952
First conference on machine translation at MIT

1954
IBM demonstrates automatic translation of samples of Russian text into English

1957
Chomsky Phrase Structure Grammar for generating and analyzing sentences

1958
ARPA (now DARPA) was founded

1959
Bar-Hillel, organizer of the first MT conference, wrote high quality MT was not feasible "not only in the near future but altogether"

1960 - 1990

AI MILESTONES

NATURAL LANGUAGE PROCESSING (NLP)

1960

Early attempt at OCR (hand-printed character recognition) by Selfridge and Ulrich Neisser

1962

Target detection in Aerial Photography (tanks) by Kanal and Randall

1964

National Academy of Sciences forms the Automatic Language Processing Advisory

1968

Shakey the robot, developed by Charles Rosen with the help of 11 others, was the first general-purpose mobile robot, known as the first "electronic person"

Conceptual Ontologies

1969

Space Odyssey (HAL)

1970

WABOT-1, the first anthropomorphic robot

Michael Kelly writes computer program to automatically detect facial features and identify people

1971

DARPA launches 5-year Speech Understanding Research program

1968

Joseph Weizenbaum develops conversational program ELIZA

1976

DARPA launches Image Understanding Research Program

1982

Japan launches Fifth-Gen Computer Systems (FGCS) program for AI-focused computers

1980-1987 (Boom)

- WABOT-2
- Expert Systems introduced by Ed Feigenbaum
- CMU demon-strates Navlab, the first autonomous car (1986)
- Black Friday

1984

DARPA launches Strategic Computing program

Two chatbots: Jabberwacky & Cleverbot

1988-1990

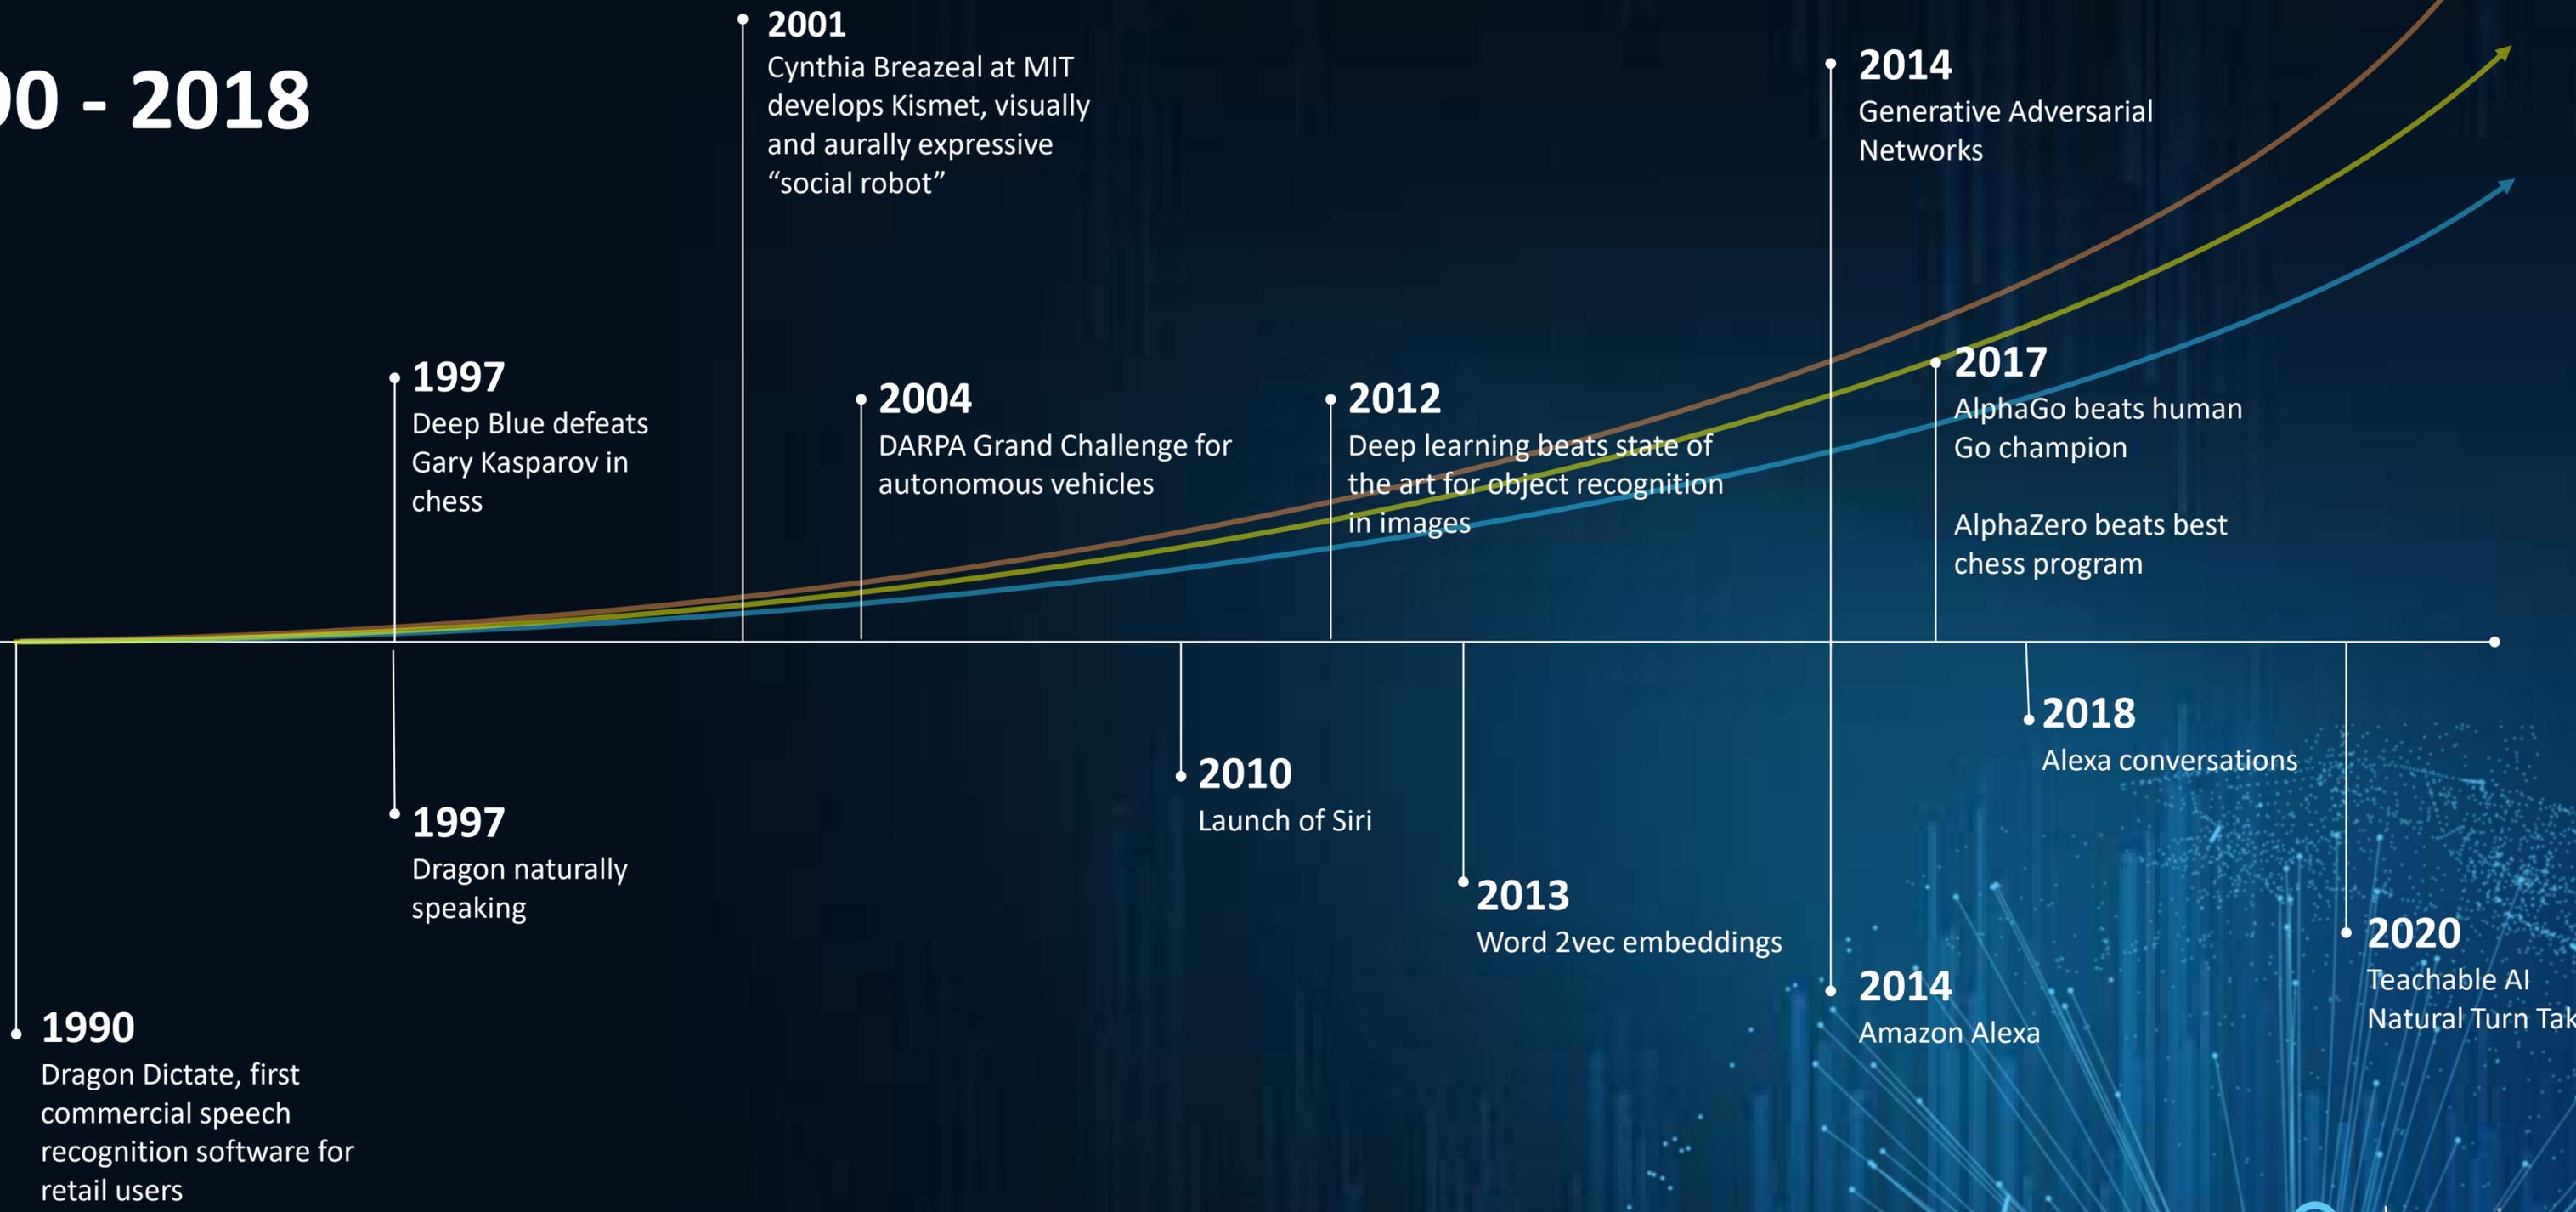

DARPA ends Strategic Computing
Japan ends FGCS

1990 - 2018

AI MILESTONES

NATURAL LANGUAGE PROCESSING (NLP)
